EDUCATION

Boston University

Jan. 2025

Bachelor of Science in Computer Science | Minor in Business Administration

- **Relevant Courses:** Distributed Systems, Probability in Computing, Concepts of Programming Languages, Artificial Intelligence, Data Structure & Algorithms, SWE in Modern Cloud Env, Combinatoric Structures

PROFESSIONAL EXPERIENCES

BNY Mellon

August 2025 - Present

Full-Stack Software Engineer

New York

- Engineered **Java/Spring Boot RESTful APIs** microservices and **TypeScript Angular** front-end for automated asset tagging and market value adjustments across **5M+** advisor models.
- Integrated **Kafka**-based event-driven workflows processing **10K+** daily events — including model changes, withdrawals, and portfolio updates — to synchronize state across downstream backend services.
- Proposed and developed an **AI-enabled MCP** platform for data and service retrieval, improving debugging efficiency and accelerating investigation of client-facing production incidents across **5+** microservices.

Mutual Of Omaha

May 2024 - August 2025

Backend Software Engineer

Remote

- Owned end-to-end development of 4+ **Spring Boot** microservices and **REST APIs** powering administrative backend integrations for insurance plans, annuities, and institutional investments.
- Built a **Python**-based unit test generator to automate valid **JUnit** test scaffolding for **Spring Boot** services, resolving **15+** recurring blockers and accelerating team delivery by **20%**.
- Authored system design docs and led technical scoping for **20+** features defining REST API contracts, proposing **database schemas**, and architecting new microservices in collaboration with business and engineering teams.

BostonHacks

Feb. 2023 - May 2025

Software Engineer Lead

Boston, MA

- Led a team of engineers to architect and deploy a full-stack web application using **React.js**, **Firebase**, and **Tailwind CSS**, serving **800+** yearly attendees with check-in and application management workflows.
- Designed and delivered **Full-Stack Development** and **RESTful API** workshops for **100+** attendees in collaboration with industry sponsors.

PERSONAL PROJECTS

SoleSync (<https://solesync-app.vercel.app/>) | *Typescript, Next.js, AWS, Flask, MongoDB*

- Built a revenue SaaS platform used by **10+** users, automating pricing and inventory syncing across marketplaces
- Frontend and Backend services created using **NextJs** and **Typescript**, designed and implemented distributed job-processing system on **AWS** services, handling pricing updates and market research at scale
- Scaled platform to **7,500+** sales, generating **\$1.2M** in GMV since launch, while improving architecture and design

OpenPoll.live | *Next.js, TypeScript, Firebase*

- Deployed an **open-sourced** live-polling app, capable of interacting with groups of people in recurring manner.
- Integrated in over **5+** classrooms, providing students a free alternate solution in tracking grades and attendance.

MapReduce & RAFT Consensus Algorithm | *Golang*

- Recreated **Fault-tolerant** distributed system capable of processing hundreds of gigabytes of data and transaction.
- Implemented RAFT consensus algorithm in **Go** verified by MIT 6.824 testing script, emulating real-life scenario.

TECHNICAL SKILLS & ACTIVITIES

Languages: Java, TypeScript, Python, Go, JavaScript, SQL, Groovy, C#, HTML/CSS

Frameworks & Libraries: Spring Boot, React, Next.js, Node.js, GraphQL, Flask

Infrastructure & Tools: AWS, Docker, Kubernetes, Firebase, MongoDB, Git, JUnit, Jenkins, Postman

Activities: BostonHacks Tech Team, HackMIT, CodePath Software Engineer Cohort, America on Tech
